The concept of equipping military officers with regional expertise, language skills, and knowledge of U.S. and foreign political-military relationships dates back to 1889 when the U.S. sent permanent military Attaches to London, Paris, Vienna, and Saint Petersburg.  

To provide a greater worldwide historical perspective, one year prior to the deployment of our military “soldier statesmen,” the Russian Social Democratic Labour Party had just been formed whose later roots evolved into the Communist Party of the Soviet Union. The following year, the “rising star” in Britain, Sir Winston Churchill was only fourteen years old, attending private school, struggling to pass the entrance examination for the British military academy at Sandhurst. This same year, the London Dock Strike had occurred, which formed the foundation of what is known today as the British Labour Party.

Additionally, in 1889, a counselor network of British-Indian officers began their assignments in Iran, the Eiffel Tower in Paris, France was inaugurated, and the Berliner Fußball-Club Marbert was formed, which became one of the founding members of the German Football Association, more commonly affiliated with the FIFA World Cup.

That same year, the Treaty of Berlin had been signed between Britain, the U.S. and Germany over the Samoan islands and the Nazi dictator Adolf Hitler was born in Braunau am Inn, Austria. To the east, U.S. Secretary of State, John Hay, negotiated the first “Open Door Policy” between the U.S. and China to establish new trade agreements and the transition of power was passed from Alexander III to his son, Nicholas the II, which reigned in the Industrial Revolution. Further advanced in the former Soviet Union, russification was well underway, forcing the replacement of language, religion, and cultural norms in the Ukraine, Poland, Lithuania, and Belarus. Amid the Industrial Revolution, following Tsarist defeat in Russo-Japan war, the 1905 Bloody Sunday massacre occurred in Saint Petersburg starting the Russian Revolution.

By 1945, the U.S./Allied victory from World War II and Nazi war tribunals had begun, the Charter of the United Nations (UN) was established, and reformation/creation of the Arabian American Oil Company paved the way of making Saudi Arabia known for having the world’s largest reserves of oil. The U.S. had military attaches in 45 capitals (38 of which had air attaches and 28, naval attaches). In parallel, the United States Army (USA) had developed the Language and Area Training Program to provide officers with high level staff potential with knowledge of language and areas to form sound intelligence estimates and to provide command decisions. The program required four years of training: language school, graduate degree from a civilian university, and two years overseas in, or near, the region of specialization.

In 1953 the program was redesignated Foreign Area Specialist Training (FAST) with continued management and oversight under the Department of Army (DA) Assistant Chief of Staff, Intelligence (ACSI). During 1956 the FAST Program expanded beyond the principal intelligence responsibilities and control to include other functional interests like psychological warfare, the Attaché system and civil affairs and military government, with the Deputy Chief for Military Operations sharing responsibility for program review with the ACSI. By 1956, the U.S. had 166 Attaché posts in 71 countries: 68 Army, 45 Navy, and 53 Air Force personnel, in contrast to sixty (60) foreign countries that had established 121 Attaches in Washington D.C.

In 1963, the FAST program was further expanded to specifically designate positions requiring FAST qualifications, which included advisor duty, special warfare operations, DA General and Special staff, area study instructors at service academies and schools, and within the national intelligence community.

Meanwhile, Secretary of Defense (SECDEF) Robert McNamara advocated for problems and other existing compatibility issues with the intent of President Lyndon B. Johnson to centralize the Attaché system under the Defense Intelligence Agency (DIA). Instead, SECDEF McNamara announced the decision to designate a Senior Defense Attaché in each country and established the Defense Attaché System (DAS) on 12 December 1964. This was the first step toward bringing the DAS under the full operational control, which the DIA Director gained on 1 July 1965.

Alongside, in 1969, a complementary program was merged with FAST called the Military Assistance Officer Program (MAOP), which focused on aspects of military advisory duty, stability operations, and civic action having social, political, economic and psychological impact. By the beginning of the 1970s, the USA had soundly established two international-oriented career programs; one driven by intelligence requirements (FAST) and the other by operational needs (MAOP).

Similar to present-day political/military conditions, against the background of the diminishing war in Vietnam, sustained withdrawal of American forces from the combat zones, fiscal constraints, and returning peacetime (Phase Zero) conditions, Army demobilization continued through fiscal year 1972 (FY72). Operational Force constructs were realigned in the Pacific and Far East to include the engagement of a five-year program to upgrade the Republic of Korea’s armed forces, USA continued “keystone” presence in Europe to support North Atlantic Treaty Organization (NATO) land defenses, and maintained an Infantry Brigade and maneuver battalions in the Panama Canal Zone, primarily providing U.S. military assistance training in Latin America.3

Because of the decrease in the level of large-scale demonstration connected with civil disorder, U.S. active military forces were not deployed during FY72. However, with a possible disturbance connected with the Governor’s Conference in San Juan, Puerto Rico, a Marine regiment was placed on alert and a liaison (LNO) representative of the Army Chief of Staff and DA LNO were sent to coordinate with local officials. While the conference was held without conflict, this was the first instance of detailed planning to deploy forces in a civil disturbance outside the continental U.S. In comparison, prior to 1972, the UN had deployed ten security and observation peacekeeping missions; three that are still active today in Jerusalem, Cyprus, and India and Pakistan, in addition to over forty (40) other missions established after 1972 to include high threat/conflict countries like Yemen, Somalia, and Afghanistan.

Complementary to UN initiatives, on April 21, 1971, President Richard Nixon proposed a realignment of foreign aid into two programs; one oriented to military assistance, the other to economic and humanitarian assistance. What became the International Security Assistance Act establishing foreign policy tools like foreign military sales (FMS), international training, and excess military equipment developed the term, “security assistance.”

Nixon doctrine also led to Department of Defense headquarters reorganization that established the Defense Security Assistance Agency (DSAA) in September 1971. USA, Europe (designated Executive Agent) took over from the Air Force the responsibility for administrative and logistical support of military assistance advisory groups and missions in the Middle East, Africa,

**Founding of the FAO Association (FAOA)**

On 17 October 1995, an informal discussion took place between a small group of FAOs located at the Pentagon. It was an ordinary session, but with an extraordinary outcome. The problem that was revealed during this pivotal discussion was that the Army had no way to contact FAOs in the active, reserve and retired communities. There was no database that captured these highly qualified individuals for the Army. The FAO Proponent was constantly receiving inquiries from the retired community seeking qualified FAOs, who were about to retire themselves or had already retired, for possible job opportunities in the civilian sector. The old-boy network was neither sufficient nor extensive enough to answer the volume of requests. Adding to the community’s communication problems, the FAO Proponent was forced to discontinue the publication of its only method for “getting the official word out” – its newsletter – for lack of funding. The question was how to solve these problems, a task Dr. Joseph Tullbane (a retired FAO himself) decided to tackle.

Over the next month, these ideas coalesced into the nascent FAO Association (FAOA), which Dr. Tullbane founded in concept on 30 November 1995. Overcoming the first issue facing the Army’s FAOA, there was enough support established to build up sufficient funds to become established. The subsequent months were occupied in creating a Board of Governors of former and current outstanding FAOs; writing an Association Charter, Articles of Incorporation, and other basic organizational elements of an organization as brochures, applications and initial data bases. By 1 January 1996, the FAOA was officially incorporated in the Commonwealth of Virginia.

The newly appointed Board of Governors met in February 1996 and validated the organizational steps taken so far. The Board members also came up with a series of goals and suggestions for where the association should go, as well as what services it should and should not offer. The intent of the organization has, from the first, been to band together the officers of the various FAO regional areas of concentration and to provide an informal social and professional forum in which members could share ideas and experiences. It is intended to unite active, reserve and retired FAOs in a mutually advantageous network, to both further Service goals and to provide an informal social and professional forum in which members could share ideas and experiences. It is intended to unite active, reserve and retired FAOs in a mutually advantageous network, to both further Service goals and to help the individual FAOs as they advance through their military careers and their subsequent civilian careers.

At its two-year anniversary, the FAOA had a total of 750+ members. It opened an active web site (www.faoa.org) and began producing the FAO Journal – our own military professional magazine.

Today, the membership has expanded farther than ever anticipated at its inception – we now have Marine, Air Force, Navy, and other civilian FAO-like members. The future of the FAOA is bright. We hope to soon expand membership to include corporate sponsors to help fund our future activities. In the next two years we also hope to add a scholarship program for worthy FAO family members, and continue to expand upon the FAOA journal.

Following the formal creation of the USA FAO program, the International Security Assistance and Arms Export Control Act (AECA) of 1976 changed the title of the 1968 FMS Act to the AECA. The 1976 Act also repealed Section 414 of the Mutual Security Act of 1954 which provided authority for commercial licensing through the International Traffic in Arms Regulation (ITAR).

Over the next ten years, security assistance programs continued to grow and by September 1981, seventy-six countries and organizations had been receiving materiel from either the military assistance program or FMS; $22.7 billion in Saudi Arabia alone. The USA solidified its FAO Program to include the establishment of an International Affairs Symposium FAO Course at the USA John F. Kennedy Special Warfare Center in Fort Bragg, N.C. Stated by LTG (Ret) Julius Becton during the 26th International Affairs Symposium on May 30, 1984, “Since the Marshall Plan days, we have truly been an international philanthropist. As a nation we have provided $125 billion in economic assistance worldwide, and supplied life-saving nutrition for over 1.8 billion people, equaling to 656 billion pounds of food to over 100 countries. We have also provided $79 billion in direct developmental assistance programs to help others help themselves.”

A Krygz Army Col. and U.S. military Attaché (USAF Lt Col) testing one of the Russian special purpose silenced assault rifles, AS "Val" delivered to the Kyrgyzstan’s special forces at the Kant Base, Russia’s first new military base on foreign soil since the collapse of the Soviet Union, near the Kyrgyz capital, Bishkek.
With the fall of the Berlin Wall in 1989 and the diminished threat of Cold War, FY92 proved to be one of the most productive in the history of the USA’s security assistance and international defense programs. In 1997 the term, “security cooperation” was first introduced by the Defense Reform Initiative. Additionally, on February 22, 1997, Deputy Secretary of Defense John P. White signed DoD Directive 1315.17, Service FAO Programs. Leveraging Title 10 authority for each of the services; Chap 303 (DA), 505 (Office of the Chief of Naval Operations), and 803 (Dept of the Air Force), this was the first directive that established policy and assigned responsibilities for the development of FAO programs within the military services.

To better reflect its enlarged mission and diverse functions beyond security other agencies, the private sector, and foreign governments; DSAA was the Defense Security Cooperation Agency (DSCA) on 1 October 1998.

FAO Policy (DoDD 1315.17) was further revised on April 28, 2005, adding Title 10, Section 163, leveraging authority for the Combatant Commands (COCOMs), stating, “The COCOMs shall have the requisite war fighting capabilities to achieve success on the non-linear battlefields of the future.” In February 2005, the Defense Language Transformation Roadmap was published and an additional DoD Instruction 1315.20 was signed on September 28, 2007. This instruction provided further guidance for the management of DoD FOA programs to include the establishment of a standardized format to be used by the military services, DoD components, and COCOMs for the Annual Report on DoD FAO Programs. The instruction also identified the Deputy Under Secretary of Defense for Plans within the Under Secretary of Defense for Personnel and Readiness as the principal staff advisor to the SECDEF for DoD FAO Programs.

Today the FAO Program continues for each of the services, which was best stated in the most recent DoD FAO Program Review and Report, “Progress has been achieved, but additional work remains to ensure that the Department is producing qualified FAOs to meet joint mission requirements.” When the FY09 report was released in August 2010, the restructured DoD Joint FAO Program had been in its fifth year of implementation with an increase of nearly 1,860 officers holding the FAO designation; an increase of an estimated 90 from FY08. The FAO program traditionally managed by the active duty military services had also expanded within several Defense Agencies like DSCA and the Defense Threat Reduction Agency (DTRA).

In FY09, the Under Secretary of Defense for Intelligence had also established a Civilian Foreign Area Specialist (CIVFAS) program, which has also been proven successful with the U.S. Navy having identified several Force Protection Detachment (FPD) civilian special agents with a FAO designation. Additionally the FY09 report encourages more FAOs to serve as Senior Defense Officials/Defense Attaches (SDO/DATTs), but also serve in expanded and new SCOs and recommends more focus on the development and growth of Reserve FAO programs.

The FAOA continues to thrive with a growth in membership and corporate sponsorship(s). The Association has enhanced their website at, www.faoa.org, and expanded its program to host a guest speaker for a quarterly luncheon, most recently, the Chief of DSCA’s Middle East Division, Mr. Mark Rumohr. Additionally, during the 2010 Annual FAOA Dinner, which hosted Ambassador Ryan Crocker as the keynote; the first color print FAO Journal was introduced along with the unveiling of a new seal recognizing the three disciplines that represent FAOs; Political-Military Affairs, Intelligence, and Security Cooperation.
